At Resolution Economics, we believe that eDiscovery is a process with enabling technology solutions designed to support the process-oriented approach, including planning, optimizing workflow, leveraging automation to improve efficiency, and quality control. We leverage our process control, optimization and excellence to deliver high quality results.

Our hybrid team of forensic and technology specialists is positioned to provide true end-to-end services related to eDiscovery, forensic investigations, dispute advisory, economic damages, and expert testimony. We help clients increase predictability using defensible, repeatable processes while leveraging the latest forensic and data analytics solutions. Our experience, combined with the leading technology and flexible pricing models, and the firm's commitment to quality and transparency, helps our team to deliver projects with lower cost, reduced risk and cost predictability.

Electronic Discovery

Resolution Economics eDiscovery services is based on a phased approach that focuses on reduction of data at each step in the eDiscovery process while demonstrating forensically sound and defensible methodology. We provide the following fully managed eDiscovery services along with an ongoing review process on an alternative and flexible fee basis:

- ◆ Data Identification, Preservation and Collection
- ◆ Data Analytics, including Early Case Assessment
- ◆ Processing, filtering and culling strategies
- ◆ Secure Hosting
- ◆ Sampling and Prioritization (custodian and system based)
- ◆ Predictive Coding and Technology-Assisted Review
- ◆ Document Review
- ◆ Project Management
- ◆ Production
- ◆ Trial Support
- ◆ Defensible Deletion

Computer Forensics

Resolution Economics digital forensic professionals employ state of the art forensic tools to collect, analyze, and make sense of digital data in the event of a breach, incident, dispute, or investigation. Our objective is to work with our clients and counsel, collaboratively, to identify, search, and comb through electronic evidence ranging from usage patterns, listings of deleted files, and others including:

- ◆ Deleted File Recovery
- ◆ Web Mail recovery
- ◆ Last accessed, modified, or created dates of files
- ◆ Internet Search and Browse History

- ◆ Chat, text, and other communication history
- ◆ Password cracking
- ◆ Registry analysis
- ◆ Evidence of external or cloud-based storage
- ◆ Evidence of wiping or file destruction
- ◆ Expert testimony

Advanced Analytics

Resolution Economics professionals employ cutting-edge forensic and analytic tools to collect, analyze, and sift through the massive volume of structured and unstructured information to identify important details and trends that can lead to actionable insights. Our integrated team of forensic and data specialists work closely with our clients and counsel to assist in managing and mining of large and complex data to extract meaningful insights. We use a number of skills and processes to assist in the following:

- ◆ Collection, extraction, preservation, and interrogation of source data
- ◆ Identification of potential fraud activities across the enterprise
- ◆ Performing predictive analytics
- ◆ Interactive visualization of findings and observations
- ◆ Custom reporting and recommendations

Our Forensic team has been involved with some of the largest, highest profile and most sophisticated investigations in recent history. Our professionals can help our clients discover the facts underlying concerns about fraud and misconduct, and assess and mitigate the vulnerabilities to such activities.
